Center for Results-Focused Leadership, LLC

Project List: Updated March 2024

Since our launch in Spring 2021, we are grateful to have a growing number of projects across the U.S. Ongoing projects are marked with ✅

✅ Helping Minnesota's Department of Correction to launch DOCstat

Project #15 | 2024 to present

- We are supporting Minnesota's Department of Corrections to launch a PerformanceStat initiative focused on the successful implementation of the Minnesota Rehabilitation and Reinvestment Act (MRRA), a major reform of its criminal justice system.

✅ Supporting Ohio's Bureau of Workers Compensation to launch BWCStat

Project #14 | 2024 to present

- We are helping the Ohio Bureau of Workers Compensation to launch the first ever PerformanceStat initiative focused on this policy area in the U.S. The work kicked off with a strategic planning offsite for senior staff in March 2024.

✅ Helping Ohio's Department of Health to launch HealthStat

Project #13 | 2024 to present

- We are supporting Ohio's Department of Health to develop and launch a PerformanceStat initiative, starting with a focus on two priority topics. HealthStat will be the first PerformanceStat initiative in Ohio government.

✅ Supporting New Mexico's Department of Human Services in launching its Health Care Authority (HCA) Performance Review

Project #12 | 2024 to present

- We are helping New Mexico's human services agency (soon to become the Health Care Authority) to launch a PerformanceStat initiative focused on its priority goals. It will be the first PerformanceStat initiative in New Mexico's executive branch.

Supporting Results for America on Evidence-Based Grantmaking

Project #11 | 2023 to 2024

- Over four convenings, we helped RFA support state education officials to weave evidence into their grant making, as part of RFA's State Education Fellowship program.

Helping Ohio launch a new performance monitoring system

Project #10 | 2023

- We facilitated workshops for state agency staff on the new initiative launched by Ohio's Office of Budget and Management, and provided technical assistance on logic modeling.

Supporting Results for America on evidence-based workforce spending

Project #9 | 2023

- We helped RFA develop an outline and content for a new online resource for state workforce leaders who want to get more ROI from their grantmaking by using evidence and data.

Developing a framework for KidStat in New Mexico

Project #8 | 2023

- We developed a suggested approach for New Mexico's Children, Youth & Families Department to having ongoing, data-driven meetings between leadership and divisions around its priorities, including child protective services.

Helping the City of Milwaukee strengthen innovation and continuous improvement in city government

Project #7 | 2023

- Teaming with EY, we helped the Mayor's Office work with a coalition of city leaders to design and propose to the mayor significant new initiatives that will promote data-driven, results-focused government and innovation.

Providing the U.S. Customs and Border Protection with training on impact evaluation

Project #6 | 2022

- We provided a day-long virtual seminar to the CBP Office of Accountability focused on the use of impact evaluation.

Helping Ohio's Department of Aging develop logic models and performance measures for their programs

Project #5 | 2022

- We helped ODA develop logic models and performance measures for all of its programs, along with conducting evidence reviews.

Providing U.S. Department of Health and Human Services with training on evidence-based grant-making

Project #4 | 2022

- Under a contract with the National Opinion Research Center, we provided training around evidence-based grant-making for the Assistant Secretary for Planning and Evaluation.

✅ Supporting Tennessee's statewide expansion of program inventories

Project #3 | 2022 to present

- Teaming with EY, this multi-year project is supporting Tennessee's Office of Evidence and Impact (OEI) to expand program inventories to 19 new agencies, helping solidify Tennessee as one of the leading states in the U.S. in terms of evidence-based budgeting.

Helping Ohio advance results-focused budgeting

Project #2 | 2022

- We helped Ohio's Office of Budget and Management develop and launch a new results-focused budgeting initiative including through workshops for state agency officials on logic models, performance measures and program evidence reviews.

Supporting New Mexico's Legislative Finance Committee develop and implement LegisStat

Project #1 | 2021-2022

- We supported New Mexico's Legislative Finance Committee in designing and launching the first application of the PerformanceStat leadership strategy to a legislative context in the U.S., with LegisStat.
